

MiniLumi

Quality imaging starts with a quality system

DNR's MiniLumi bio-imaging system meets researchers' demands for reliable fluorescent and colorimetric applications.. Combining superior optics with a high-quality camera and versatile illumination options.

The MiniLumi brings the most accurate results with maximum detail all at the touch of one button.

The MiniLumi Advantages

- **Advanced resolution:** High-quality images with precise sample separation
- **Range of illumination options:** Enables epi and trans UV, 8-filter wheel compatible with the range of Qdot applications and all UV excited fluorophores
- **Simple operation:** One-click image capturing
- **Semi-motorized lens:** Zoom, iris, and focus
- **Real-time image viewing and analysis:** Easy to use with fast results
